

Full-stack Developer

About us:

Contexta360 is a double-digit growth company based in Amsterdam. We are a team of highly skilled software developers and computer scientists with a passion for artificial intelligence, speech2text and natural language understanding.

Contexta360 builds speech analytics solutions to help enterprises transform service, performance, revenue and CX. Our AI-driven speech intelligence is designed for organisations seeking to know and serve their customers better.

To keep improving our platform and innovating new solutions, we are looking for a full-stack developer. If you are bright, tenacious, like to take ownership and want to work in the exciting world of speech analytics and AI, we should talk.

What we offer:

- The opportunity to work in a team of passionate, diverse and highly driven software developers who work on cutting edge technology. We work hard, party hard and live for what we do: disrupting the world of speech analytics
- A tech start-up experience with a flat hierarchy and the opportunity to make an impact
- Our headquarters are in the most beautiful area of the famous Amsterdam Canal District
- Great/competitive financial compensation.

What we are looking for:

- 3+ years' experience writing high quality, reusable and robust code that is easy to maintain
- Code writing experience for both frontend and backend applications
- MSc degree in Computer Science or a related technical field
- Strong JavaScript skills
- Relevant experience with cloud computing services
- Candidates who are constantly on the lookout to improve scalability, security and system performance
- Willing to learn about new tools and technologies
- Good communication skills.
- **Required language** - English.

Our stack:

- AngularJs, Reactjs
- Java 11 (Spring Boot) and Maven
- Elasticsearch
- Nodejs
- Python
- MongoDB, Redis
- AWS, Azure, Docker, Kubernetes
