

Junior Software Developer

About us:

Contexta360 is a double-digit growth AI company based in Amsterdam. We are a team of highly skilled software developers and computer scientists with a passion for AI, speech-to-text and natural language understanding.

Contexta360 builds speech analytics solutions to help enterprises transform service, performance, revenue and customer experience. Our AI-driven speech intelligence is designed for organisations seeking to know and serve their customers better.

All our junior developers have now been promoted within Contexta360, opening the way for our next wave of junior superstars. If you are bright, tenacious, want to take ownership and would like to work in the exciting world of speech analytics and AI, we should talk.

What we offer:

- The opportunity to work in a team of passionate, diverse and highly driven software developers who work on cutting edge technology. We work hard, party hard and live for what we do: Disrupting the world of speech analytics.
- Competitive salary.
- 25 vacation days.
- Flexibility - we trust you to make the right decision about when and where you do your best work.
- The opportunity to make an impact in a team that values your input.
- A work environment with plenty of opportunities to challenge yourself and grow.
- Our headquarters are in the most beautiful area of the famous Amsterdam Canal District.

What we're looking for:

- Passion for writing high quality, reusable and robust code that is easy to maintain and extend.
- MSc degree in Computer Science or a related technical field.
- Experience coding in at least one of the following languages: Python, Java or JavaScript.
- Ability to write great documentation.
- Attention to detail.
- Good communication skills. Required language is English.
- Willingness to explore new tools and technologies.

Bonus points if you're familiar with:

- Cloud platforms (e.g., AWS, Azure, GCP).
- Automated testing tools (e.g., Selenium, Cypress).
- Microservice architecture.

Our pledge:

We don't care about your ethnicity, gender, religion, disability, age or sexual orientation. We strongly encourage people from underrepresented groups to apply - if you think you have what it takes to succeed in this role, we'd love to talk to you.

Our stack:

- Java 11 (Spring Boot)
- Python
- JavaScript, TypeScript
- NodeJS, ReactJS, NextJS
- Elasticsearch, MongoDB, Redis
- TensorFlow, MLflow
- Docker, Kubernetes
- AWS, Azure
